SUBJECT : 1. Damaged Atlas Missile Examined in Moscow  
2. Soviet Submarine Construction Policy  
3. Atomic Warhead Storage Area

50X1-HUM

1. Part of a badly damaged US Atlas missile has been acquired by the USSR from Cuba. The missile is in Moscow at Laboratory Number One of the Artillery Engineering Academy i/n Dzerzhinskiy. An official who saw the missile said that it was badly damaged by ground impact, that it was made of several segments, but that individual subassemblies could be rebuilt and studied, which is being done.

50X1-HUM

2. In mid-1961 Khrushchev completely scrapped the naval surface fleet program, deciding to spend the extra money on building up a submarine fleet. In May 1962 Khrushchev was continuing to push heavily the construction of submarines with nuclear propulsion.

3. An atomic warhead base [ ] subordinate to the Chief Missile and Artillery Directorate (GRAU) is located at Rybinsk (N 58-03, E 38-50).
